PLATINUM SIGNS

Council Street Flags

Prepare your artwork

- Supply a CMYK PDF with all fonts converted to outlines and all images and elements embedded. Do not include trim, crop or registration marks.
- Use the template for your selected type and size at 100% scale. Preserve its loop, pocket, bleed and safe-area geometry; do not resize the template.
- Bitmap images must be at least 130dpi at full finished size.
- If a Pantone colour is required, specify it from the PANTONE+ Solid Coated library.

Choose the correct size

- The table distinguishes the nominal flag size from the template labelled finished outline. Use the exact type and size template for production artwork; do not resize it.

Type and size	Nominal flag (mm)	Template outline (mm)
Type A Small	1000 x 3000	1085 x 3250
Type B Small	1000 x 3000	1085 x 3250
Type A Large	1500 x 4500	1600 x 4710
Type B Large	1500 x 4500	1600 x 4710
Standard Large	1500 x 4500	1600 x 4590

Supply your artwork

- Supply artwork with your order. If you need help preparing the production file, choose artwork assistance.
- Check spelling, artwork size, colours, print sides and the selected template before approving your proof.

Council approval

- Confirm local council requirements and obtain any required artwork approval before ordering. Match the selected loop and top-pocket arrangement to your existing hardware. Flag fabric only; poles, brackets and installation are excluded.
