Rectangle Flag Assembly Guide

Black and White Sleeves

Step 1: Unpack the carry bag and assemble the flag pole by joining the separate pieces together. Simply insert one end of the pole into the other and push them together starting with the largest to the smallest. Leave the horizontal pole (with the right angle bend) unattached.

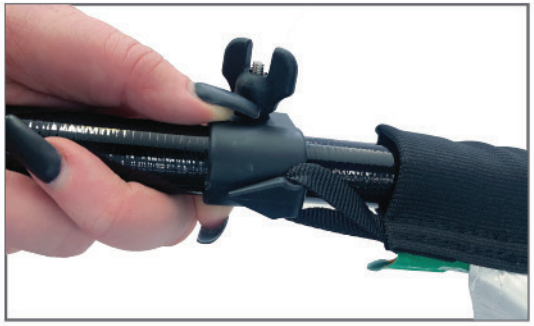

Step 2: Insert the horizontal pole into the top/horizontal rod pocket of the flag. Make sure the pole is pushed right through to the plastic stopper at the very end.

Step 3: Insert the vertical pole into the side/vertical rod pocket of the flag. Keep feeding the fabric until you reach the locking mechanism at the bottom and the top of the vertical pole pops out of the rod pocket.

Step 4: Join the horizontal and vertical pole together.

Step 5: Attach the fabric loop to the hook on the locking mechanism.

Step 6: Pull down the flag to the right tension.

Black and White Sleeves

Step 7: Twist the butterfly screw to secure the locking mechanism.

Step 8: You are done! You should now have an awesome looking rectangle flag!
